HDTV/DTV - Frame

Evertz 7700 MULTIFRAME

The Evertz 7700 Multiframe is the ideal solution to today's vast digital video and audio processing and distribution requirements. It provides flexibility to handle the high-speed requirements of HDTV as well as analog and SDTV. The Multiframe supports extraction of the modules from the front without compromising performance even at 1.5Gb/s. Hot extraction is supported on various types of interfaces including VIDEO, AUDIO and FIBER.

The 7700 Multiframe is a 3RU frame designed to house up to 15 modules in various combinations and configurations. With an integral thermal design and over 3000 experimental measurements to back it up, the Multiframe ensures sufficient thermal relief under all load configurations.

Features/Specifications:

- Dimensions: 3RU (H) x 19" (W) x 12" (D)
- Power supplies and cooling fans are front extractable, redundant and hot-swappable
- Houses up to 15 front loading processing modules with I/O
- Each slot has individually configurable inputs and outputs
- Monitoring window for verifying Modules and Power Supply Status
- Frame Status Contact closure/open on Power Supply failure, Fan failures and User selectable Module alarms
- No recabling required when hot swapping modules or power supplies
- Auto ranging Power Supply operates from 90-250VAC at 60/50Hz
- High-speed bussing and control system provided for modular applications
- Weight: Approximately 30 lbs. (Frame with 2 Power Supplies and 15 Reclocking DAs)
