Product Description

Adopt High-Load Li-ion Cells

Normal Li-ion batteries offer 100W/8A output and suitable for most ENG cameras, but the Cine Cameras such as ALEXA require around 85W high draw which is too heavy for the normal Li-ion batteries: the battery life will be reduced if long time full draw powering. Moreover, if there are monitor, lighting work together, and total power will be above 100W, and the normal batteries can not draw completely.

Using **S-8183A** high-load battery, you can get MAX 180W/15A constant power output, which can drive more high power cameras, lightings and other equipments easily, and won't reduce battery life during long time high power output.

Key Features:

- High-load Li-ion cells
- Max 180W, 15A constant output
- 14.4V, 240Wh capacity
- D-tap output socket
- 4-level LED power indicator
- Gold Mount connection
- Multiple circuit protections

Specification:

Normal Voltage	14.4V
Capacity	240Wh/16.7Ah
Max output power	180W
Max output current	15A
Mount type	Gold Mount
Operation temperature	0- 40°C
Net Weight	Approx. 1.3kg
Dimension	165x90x66mm

240Wh/16.7Ah High Capacity

Consists of 24pcs 18650 battery cells, and reach 240Wh/16.7Ah high capacity. Can run approx 8 hours for normal 30W ENG cameras; and approx 2.5 hours for ARRI Alexa camera

6A Fast Charging

S-8183A supports 6A fast charging, to save more than 50% charging time, can be charged from 0 to 80% after 2.5 hours, and fully charged within 3.8 hours.

Build-in D-tap DC Output Socket

A D-tap DC output socket is equipped on the top side of **S-8183A** battery, for DC14.4V (Nominate) connection, such as on-camera lights, monitors, wireless transmitter, etc. The Max Power from D-tap is 120W, 10A.

4-level LED Power Indicator

On the side of the battery, there are 4-level LED power indicators to check the battery remaining capacity. You can get a quick view of capacity before using.

Warranty Period:Two years conditional.
