TS100U

(mm)

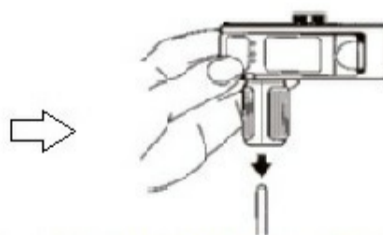

1. Turn cam knob to the right cable selection.

2. Straighten cable and insert into handle grip.

3. Close lid, firmly grasp handle grip, and slowly rotate 7-10 times.

4. Push open lid, pull cable while firmly pressing yellow flag level.

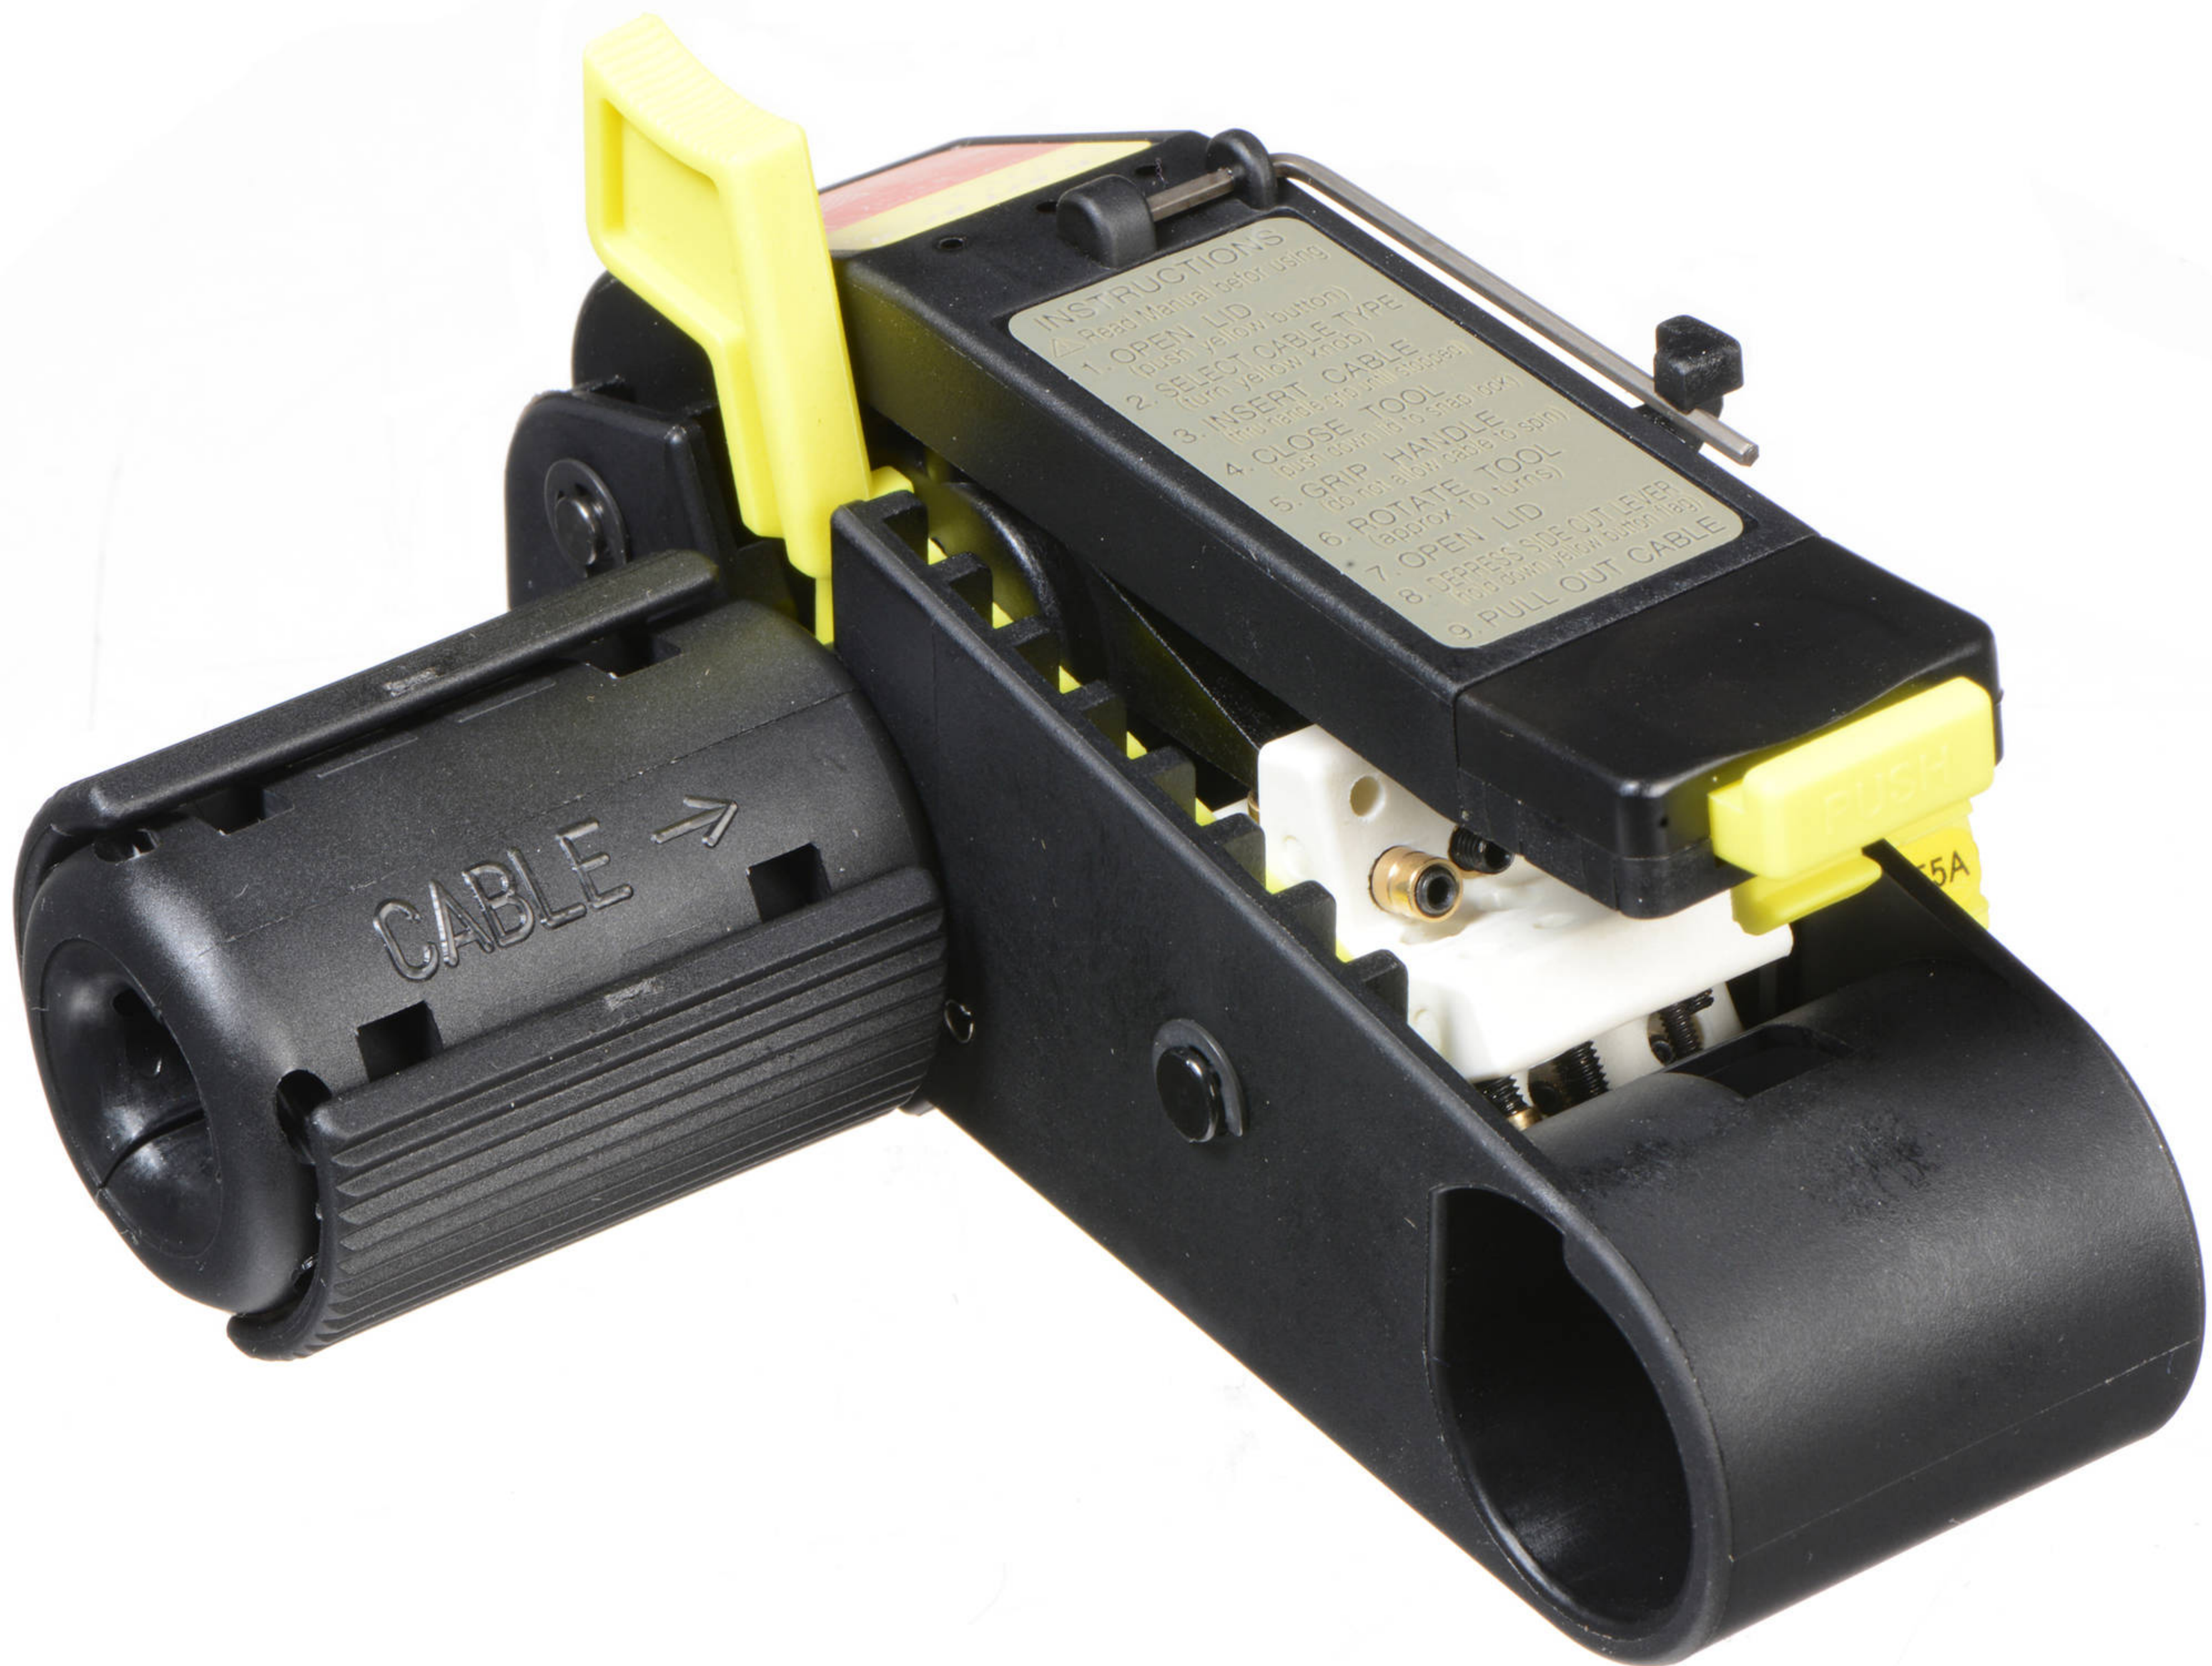

5. Insulation and jacket will be easily peeled off.

Note:

The following types of cables may not be accurately processed by Canare's TS100E Cable Stripper, owing to their construction.

- 1. Cables employing such hard jacket material as polyethylene.
- 2. Cables employing such particularly soft insulator material as highfoam polyethylene.
- 3. Cables employing steel wire and semirigid pipe for outer conductor.
