

FLUID HEADS SFX

LAMBDA 50 ✓

DESCRIPTION

The Award winning LAMBDA Nodal Head is the only Support that allows to set the nodal position with any Camera and pivoting 360° pan, tilt and roll, on the focal plan of any Camera.

The settings are achieved by graduated slides both horizontally and vertically with micrometric cranks for extreme precision. A smart system of orientable counterweight rods can be used when the slide run is not sufficient.

The LAMBDA 50 Head can be mounted on any classic support as Tripods or Dollies or used in underslung position from Cranes and Jib arms.

Optional accessories as 3rd Axis, the orientable pan bar, steering wheel, eyepiece holder and the counterweight rods complete the most versatile of supports.

COMMERCIAL CODE: HL5000

TECHNICAL DATA

Minimum Payload Capacity	0 kg
Maximum Payload Capacity	50 kg - 110 lbs
Weight	21.0 kg - 46.3 lbs
Bowl Diameter	Flat
Type	Nodal
Fluid Drag	7 steps + 0
Counterbalance	0
Pan Range	360°
Tilt Range	+/-65°
Temperature Range	-40°/+60°
