

FLUID HEADS SFX

TOTAL DUTCH

DESCRIPTION

A patented new revolutionary tool to add a 3rd axis lateral rotation to any classic heavy duty pan and tilt head

Allows unprecedented 360 ° rotation for extraordinary creative shots.

The rotation is driven by a steering wheel pierced in the center for cable channel.

Two 1 kg counterweights complete the set for true nodal rotation around the optical center.

The Total Dutch head is available as a product ready to be installed on top of any head via two 3/8 " screws, or can be composed with Lambda 25 Dutch axis plus the camera stage of the Lambda 25 head.

After setting the standard with its famed DUTCH Head in 2000, CARTONI has expanded the canted angle capability, creating the ultimate in DUTCH angle compositions.

COMMERCIAL CODE: HL2500/TD

TECHNICAL DATA

Minimum Payload Capacity	0 kg
Maximum Payload Capacity	25 kg - 55 lbs
Weight	10.5 kg - 23.1 lbs
Bowl Diameter	Flat base
Fluid Drag	Continuous
Pan Range	360°
Temperature Range	-40°/+60°
