V-mount Battery Application

S-7000S is the standard V-mount battery plate for customers to adapt V-mount power solutions. The structure and power pins ensure a stable and reliable connection.

D-tap Output Socket

The S-7000S battery plate is equipped with a D-tap DC output socket, for simultaneous DC power output with the V-mount pins.

Open-end Wires

S-7000S provides the open-end wires and rear metal plate for customer connection and installation.
